

Halolux 150 Halogen Light Source

A superbly built, powerful bench-top light source with electronic light output control

- Cost effective
- Powerful
- Smooth electronic light control
- Encased internal components
- Made in Germany

RVA presents the Halolux 150 industrial halogen light source. These incredibly well built units are suitable for bench-top use and are mains operated. Most equivalent light sources on the market today, have a mechanical shutter to control the light output, but the Halolux 150 has an electronic output regulator. This means that the light can be much more finely adjusted. The internal components are encased for electrical and ingress protection. Halogen light is suitable for use in most circumstances where a reliable, powerful source is required.

Technical Specifications

Voltage Supply: 230vac 50/60Hz

Power: 170 Watt

Fuse: T (slow type) 2,0A

Lamp Life: 50-150 Hours

Colour Temperature: 3.400 °K

WxHxD 150x120x230mm

Weight: 4.3 Kg
